

2018 Sediment? *Solved* Roadshow

Aquatec is pleased to announce the launch of the 2018 Sediment? *Solved* Roadshow – a series of lunch and learn events across the UK during June and July.

With a wide variety of measurement methods available, selecting the most suitable instrumentation for observing and collecting suspended, deposited and bedload sediment can be a challenge. The Sediment? *Solved* roadshow features talks on the benefits and limitations of different techniques, including optical and acoustic suspended sediment measurement, grabs and corers, and options for collecting water samples.

The roadshow starts in Aberdeen on 6th June, includes events in London, Hull and Southampton, before finishing in Liverpool on 10th July.

The events are **free** to attend and include networking and lunch, as well as talks on sediment instrumentation, observation techniques and collection methods. Places are limited and pre-booking is essential.

More information can be found at www.sedimentsolved.com, or by emailing sediment@aquatecgroup.com.

About Aquatec

The Aquatec Group are creators of innovative instruments, services and solutions for measurement, monitoring and communication underwater. They provide instrumentation solutions for all water environments, including offshore structures and pipelines; oceans, estuaries, rivers and lakes; and marine mammals and fisheries. Aquatec was founded by the current Managing Director in 1990 as a specialist consultancy in oceanographic instrumentation design. Since then, the company has established a diverse portfolio of products for measurement of physical oceanographic and process parameters including temperature, depth, vibration, attitude, suspended sediment and marine mammal activity, as well as underwater data communication systems and marine mammal deterrents.
