[Basingstoke, UK] – Aquatec, a pioneering developer of innovative subsea instrumentation, is pleased to announce a strategic rental partnership agreement with RTS – Rental Technology & Services, an international provider of electronic engineering equipment for the underwater industry. This collaboration will make Aquatec's state-of-the-art LEAKlog® devices available for rent through RTS, offering cutting-edge leak detection solutions to the global offshore sector.

Aquatec's LEAKlog® devices utilise a comprehensive range of detection techniques, including fluorescence, passive acoustic, and thermal gradient detection. These devices can be deployed by a diver or remotely operated vehicle (ROV), providing versatile and reliable leak detection for various underwater applications.

Andy Smerdon, Managing Director of Aquatec, expressed enthusiasm about the partnership: "We are excited to collaborate with RTS, a leader in the provision of rental equipment for the underwater industry. This agreement allows us to extend the reach of our LEAKlog® technology, providing more offshore companies with access to our innovative solutions. Our leak detection technology is critical for ensuring the integrity and safety of subsea operations, and we are confident that RTS's extensive rental network will help us achieve this goal."

David Currie, Managing Director of RTS UK, also shared his thoughts on the partnership: "We are delighted to add Aquatec's LEAKlog® devices to our rental portfolio. The industry-leading leak detection technology from Aquatec is a valuable addition to our offerings, providing our clients with advanced solutions for their subsea projects. This partnership aligns perfectly with our mission to supply the best technical solutions to the world's major offshore companies involved in fish farming, renewables, inspection, seabed mapping, and subsea construction projects."

RTS has established itself as a trusted provider of high-quality electronic engineering equipment for the underwater industry. Their extensive rental inventory and technical expertise make them an ideal partner to distribute Aquatec's LEAKlog® devices, ensuring customers worldwide can access these innovative leak detection tools.
